Freedom to Learn, Seek the Truth, be the Light

M.S Kurhade*

*"You must begin by knowing
That you have already arrived.
Your true nature lives as perfect as
an unwritten number, everywhere
at once across space and time."*

— Richard Bach

We are privileged to celebrate the 76th anniversary of India's independence. In the midnight hour of the 14th -15th of August, 1947, 'the soul of India in the words of Pandit Jawaharlal Nehru, it's the long-suppressed found utterance, but not fully or substantially'. It is natural that we celebrate this defining moment in our national destiny with zeal. But, even as we do so, it is necessary that we engage with the meaning and discipline of freedom. What does it mean to be free? What are the dangers that the legacy of freedom faces today? What does it take to be good and faithful custodians of freedom? How can we ensure that freedom does not, under our watch, degenerate into tyranny and bondage?

These questions are pertinent, even pressing, because the birth of our freedom coincided with the outbreak of the most horrendous communal violence in the history of the Indian subcontinent. Many did not live to enjoy our hard-won freedom.

The founders of religions were fundamentally liberators of humanity. Prince Siddartha who would later be the Buddha renounced earthly possessions and pleasures to illumine the path of human liberation from the sea of suffering in which earthly existence remains submerged. Rather than become the powerful king of a people, he chose to be the spiritual liberation for all humankind. Similarly, Jesus Christ prioritized the need for human liberation. I have come, he said 'to set the captives free'.

The liberation they addressed pertains to what philosophers call the native freedom of human beings. Native freedom is freedom that inherent in being human. We may call it species freedom. The native freedom of a bird includes the freedom to fly, which is not native to us. The critical awareness of the world and the self capacity for self-criticism- is native to us, but not to birds and animals. So, it is necessary that the scope of freedom we celebrate is understood in relation to what it takes to be human. What empowers and ennobles human beings, as against what corrupts and degrades them is the substance of freedom. The freedom to be sub-human endangers freedom.

         - Richard Bach

We are privileged to celebrate the 76th anniversary of India's independence. In the midnight hour of the 14th -15th of August, 1947, 'the soul of India in the words of Pandit Jawaharlal Nehru, it's the long-suppressed found utterance, but not fully or substantially'. It is natural that we celebrate this defining moment in our national destiny with zeal. But, even as we do so, it is necessary that we engage with the meaning and discipline of freedom. What does it mean to be free? What are the dangers that the legacy of freedom faces today? What does it take to be good and faithful custodians of freedom? How can we ensure that freedom does not, under our watch, degenerate into tyranny and bondage?

These questions are pertinent, even pressing, because the birth of our freedom coincided with the outbreak of the most horrendous communal violence in the history of the Indian subcontinent. Many did not live to enjoy our hard-won freedom.

The founders of religions were fundamentally liberators of humanity. Prince Siddartha who would later be the Buddha renounced earthly possessions and pleasures to illumine the path of human liberation from the sea of suffering in which earthly existence remains submerged. Rather than become the powerful king of a people, he chose to be the spiritual liberation for all humankind. Similarly, Jesus Christ prioritized the need for human liberation. I have come, he said 'to set the captives free'.

The liberation they addressed pertains to what philosophers call the native freedom of human beings. Native freedom is freedom that inherent in being human. We may call it species freedom. The native freedom of a bird includes the freedom to fly, which is not native to us. The critical awareness of the world and the self capacity for self-criticism- is native to us, but not to birds and animals. So, it is necessary that the scope of freedom we celebrate is understood in relation to what it takes to be human. What empowers and ennobles human beings, as against what corrupts and degrades them is the substance of freedom. The freedom to be sub-human endangers freedom.

Dear PRATHYUSHA. KUNCHA,

It gives me great pleasure to share with you the March-April edition of *IIT Madras Shaastra* magazine. As you will find, it has many interesting articles across a range of science and technology themes in simple language that is readable, relatable and actionable.

You will also find that the magazine showcases work being done by scientists and technologists at many leading research institutions in India and around the world. Among many interesting stories, the current edition features

- cutting-edge work in the field of synthetic biology by scientists at the **International Centre for Genetic Engineering and Biotechnology,** and at the **Saha Institute of Nuclear Physics.**
- an ongoing study, by seismologists at the **Indian Institute of Science,** of ancient earthquakes in order to predict the next big one.
- the attempt, by scientists at the **National Botanical Research Institute,** to grow "a miracle crop" that has a range of uses.
- the use, by computer scientists at **IIT Kharagpur,** of Artificial Intelligence to facilitate better legal services.
- a story on the early detection of cancer through non-invasive means by engineers from an interesting start-up, Sascan Meditech.

I trust you will enjoy reading the articles as much as we have enjoyed putting them together in a magazine format. If you do, please consider subscribing to Shaastra magazine by scanning the QR code below.

With best regards,

Mahesh Panchagnula
